SKU: SPKR-12-8 / SPKR-12-T    Category: Analog Speakers

### Description

The white 2×2 ceiling tile design of this speaker results in an attractive installation that is quick and easy to perform. It provides paging of voice, tones and background music and is available as an 8-Ohm speaker (SPKR-12-8) or with an 25/70V transformer (SPKR-12-T).

The 8-Ohm model can be connected to the [IP Ceiling Speaker](#) to enhance coverage in larger rooms (typically 500 – 800 sq ft).

Use 25/70V transformer model in combination with Digital Acoustics [IP Amplifiers](#) and [TalkMaster FOCUS](#) to drive a traditional 25V or 70V paging system.
