

TalkMaster™ Focus

## Enterprise Operator

Powerful Windows™ software for managing your IP audio systems.

### Description:

**TalkMaster™ Focus (SW-TMF-EO)** is the industry-leading platform for managing IP audio endpoints; intercoms, amplifiers, horns, and zone controllers can be connected over local and wide-area networks.

**TalkMaster™ Enterprise Operator (SW-TMF-EO)** unlocks the ability to add multiple operator consoles to a single paging and intercom system, and increase your endpoint limit to 15k devices. Each operator can be assigned different levels of priority and authority, dividing up responsibility on a campus or in a building. With high counts of intercoms on your site, having multiple operators and call rules built into Enterprise Operator ensures no call goes unanswered.

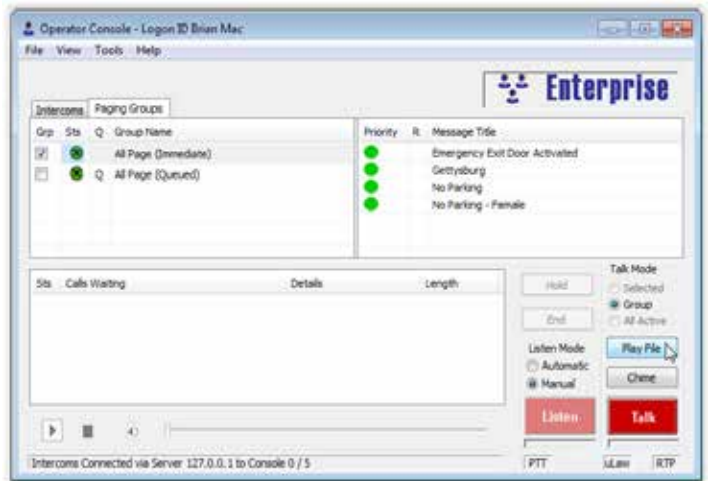

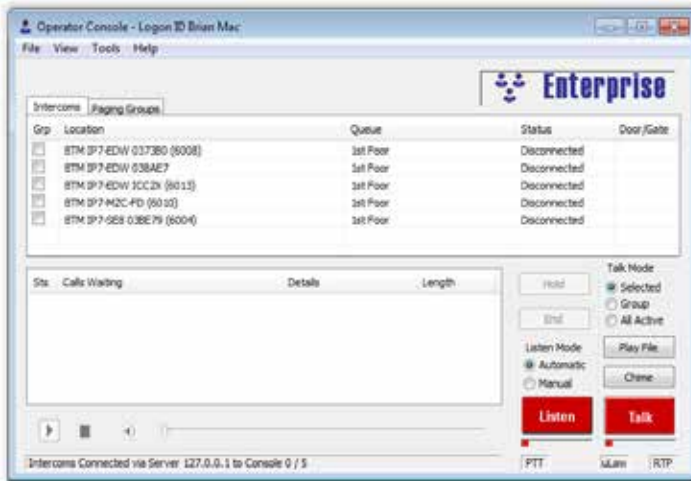

### Features:

- Multiple console login
- Up to 15K endpoints
- Live-voice paging
- Pre-recorded message playback
- Endpoint status monitoring
- Redundant server backup (Fail Forward™)

**Enterprise Operator is mission critical & operator friendly. SW-TMF-EO can be found in:**

- Education (K-12 & Higher Ed)
- Transportation & Parking
- Military & Government
- Industrial & Manufacturing

## Screenshots:

## System Requirements:

- Windows 7, 8, 10 Server 2008, 2012
- 4GB Ram
- 3 GHz multi core and higher
- 1G hard drive space
