

TalkMaster™ FOCUS

Server

Windows™ software for managing IP Intercom and IP Paging with your IP7 Endpoints.

Description:

TalkMaster™ FOCUS is the industry-leading platform for managing IP audio endpoints. IP7 intercoms, speakers, amplifiers, horns, and zone controllers can be connected over local and wide-area networks.

Expand coverage by adding additional Enterprise Operator Consoles licenses and extend the capabilities by adding TalkMaster FOCUS Vision, Automation, Fail Forward, and VoIP Connect software components.

The TalkMaster download Includes the:

- Administrator Console for configuring IP7 Endpoints and TalkMaster Server options
- Operator Console for managing Intercom Calls and Paging
- Firmware Management Console for updating IP7 Firmware
- Restart Utility for starting and stopping all of the TalkMaster services

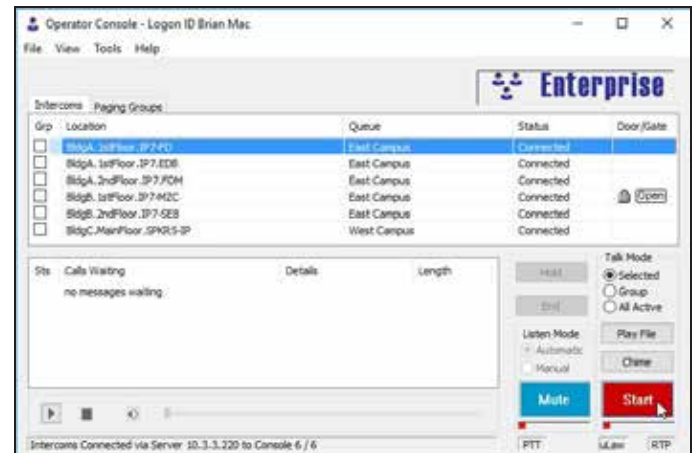

Features:

- Manage IP Endpoint Configuration
- Manage 2-way IP Intercom calling
- Manage 1000's of IP Paging Groups
- Use live or pre-recorded Messages
- Automatic Event Logging
- Optionally record all Audio Sessions
- IP Endpoint status health/monitoring
- Fail Forward™ Redundancy
- Scales to thousands of Operators and IP Audio Endpoints

TalkMaster Focus is mission critical & operator friendly. SW-TMF-S can be found in:

- Education (K-12 & Higher Ed)
- Transportation & Parking
- Military & Government
- Industrial & Manufacturing

Screenshots:

Minimum System Requirements:
